

# RIVERSIDE CROSSING PARK

## DUBLIN, OHIO

**Catalyst for Development**  
Bridges the gap (literally) from  
Historic Downtown to development  
sites across the river

**Walking Paths**  
Waking paths and a newly  
construction pedestrian bridge

**Fountain / Splash Pad**  
Water wall and splash zone for  
children adjacent to seating  
areas

**Improved River Access**  
Direct access to river for fishing,  
canoing and kayaking

**Educational Opportunities**  
Educational Opportunities and  
scenic overlooks

## DESCRIPTION

Through early community planning for the Bridge Street District, the Scioto River corridor through Historic Dublin was identified as the focal point for initial public investment. The invaluable community assets of the river and historic core offered the foundation for expanded civic space within the heart of the community. The planning for Riverside Crossing Park envisioned increased recreation, scenic and education opportunities along the riverfront, while providing protection for sensitive natural features and enhancing ecological systems.

## OUR ROLE

MKSK led the park master planning, design and implementation process in conjunction with the City and input from the community.

## IMPACT ON RAPID 5

The new park will be an important part of a broader system of regional parks and local recreational systems, linking to these assets through extensive bicycle/pedestrian facilities, canoe/kayak access points, and scenic natural connections. The west side of the park is envisioned as a more naturalized area with connections to the Indian Run greenway, Scioto River access, and trail systems and the east side is more programmed with plazas, restaurant space, seating areas, and water feature.

## TIMELINE

2021 Construction

## CONTACT

### Client Reference

*City Of Dublin*  
*Matthew Earman, Parks Director*  
614.410.4568, 614.410.4707  
mearman@dublin.oh.us

### Key Staff Involvement

*Darren Meyer, PLA, ASLA, AICP,*  
*Principal in Charge*  
*John Woods, PLA, ASLA, Project*  
*Manager*
